Bachelor of Science in Accounting

Earn Your Business Degree Close to Home with NJCU's "3+1 Advantage"

The NJCU Bachelor of Science in Accounting offers excellent career opportunities. Accounting graduates enter the workforce with an understanding of financial statement reporting and analysis, managerial accounting, taxation, government accounting, auditing, business law, and Excel applications. Students also are exposed to multiple business disciplines in the core curriculum of their degree, which includes managerial finance, business strategy, management, and marketing. Accountants have the opportunity to work in many areas, including audits, corporate record keeping, taxation, budgets, financial planning and analysis, and advising companies as they create new products and services.

An accounting degree from NJCU also prepares students for graduate studies in accounting, finance, management, and marketing. Combined with the graduate program in accounting, students fulfill the course requirements for taking the Certified Public Accountant (CPA) examination.

"Employment of accountants and auditors is projected to grow 6% from 2018 to 2028."

U.S. Department of Labor, 2019
