# Stunited App Overview

2020

Stunited is used by students to connect and match with one another based upon their academic strengths and needs.

The app's social media/dating-app functionality allows users to pick and choose which students they prefer to work with.

Stunited fosters personal relationships as well as a collaborative community of students from across the globe.
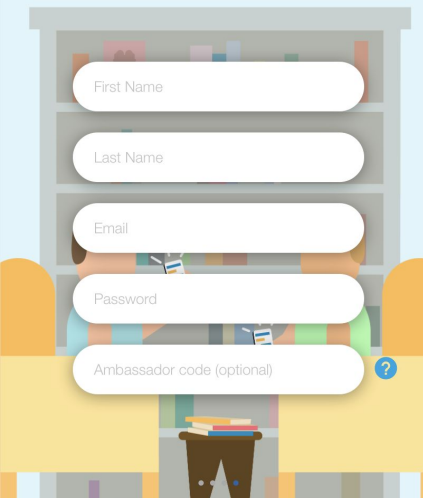

App Cover Page:
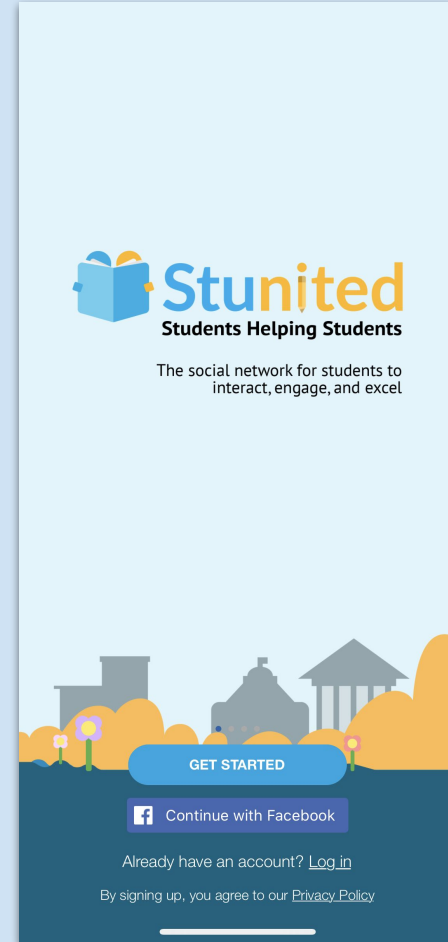

Login Screens:

Users are prompted to create a profile with their school email addresses.

Each student will be asked to provide academic information such as college, major, graduation year, etc.

*Note: Students are not required to upload personal or private information into the app.

Profile Completion & Cardstack:

Once a profile is complete, students will be placed into a cardstack.

Students have the ability to swipe right and "approve" other profiles or swipe left and "deny" them.

Students can now communicate directly with those that they have swiped right on.
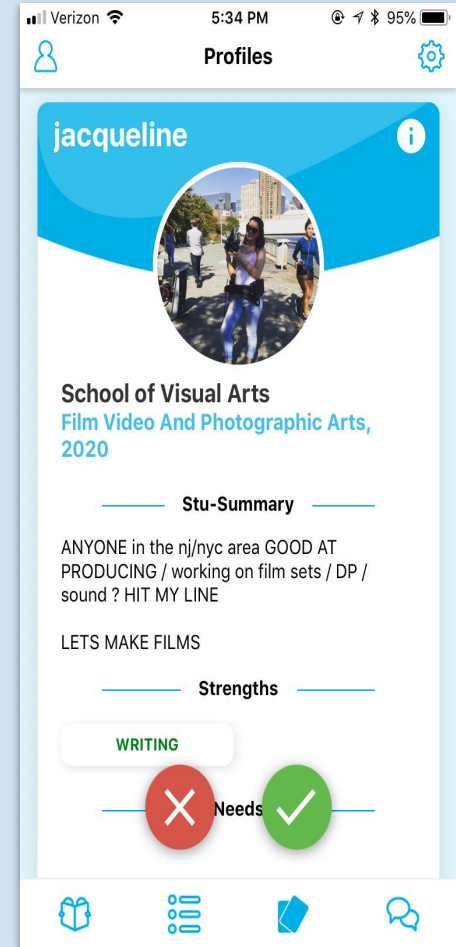

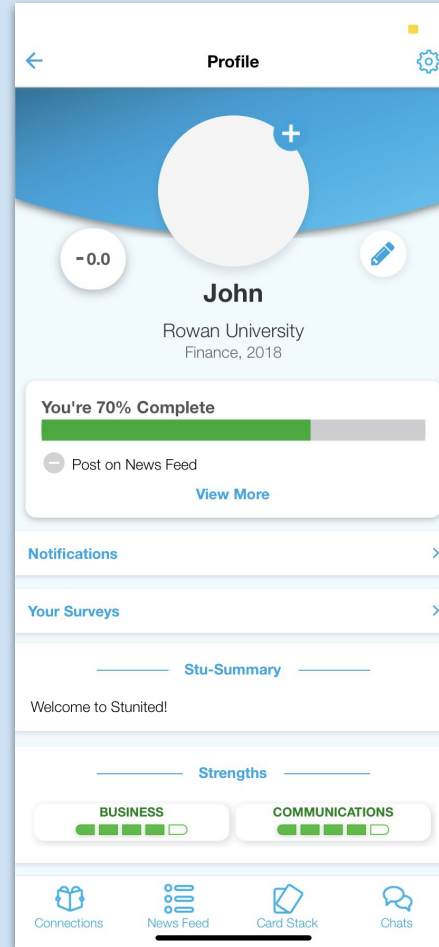

Newsfeed:

Along with a cardstack, Stunited offers a newsfeed for students to collaborate with everyone.

Users can post, like, comment and engage with one another to spark conversation and increase engagement.

In addition, the newsfeed can serve as an announcement board for schools to keep students updated.
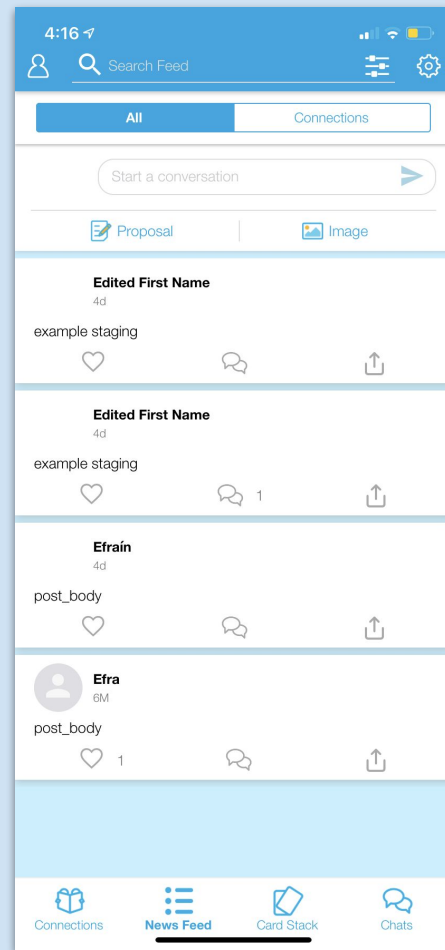

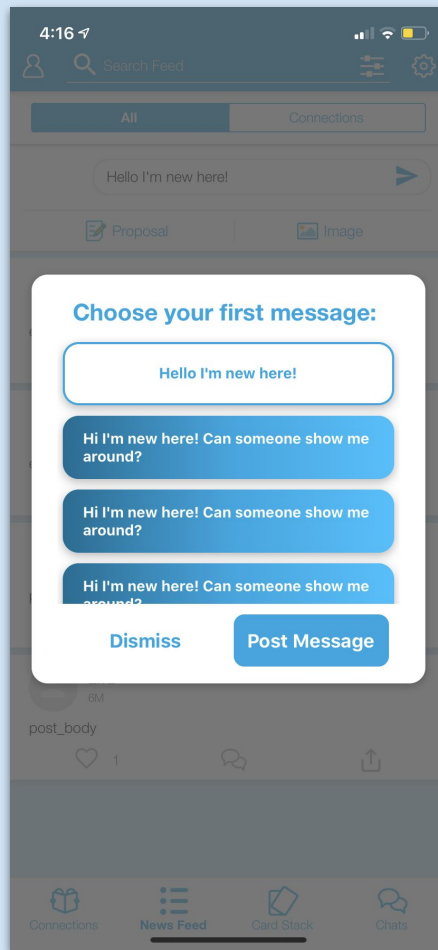

Messaging:

Students that are connected with one another have access to a private chat.

Private chat discussions can include service bartering, proposal acceptance or introductory conversation.

Hello John a professional academic writer here, I can handle the 10page paper
3d ago

Hey Lewis! I'm actually the founder of the app, technically this version is still in Beta.
4m ago

I'm happy you're already on the platform though! How did you hear about us?
3m ago

Welcome to Stunited!
