

ONLINE MATH EMPORIUM

Winter 2021

This is a 10 day MATH program offered by NJCU that helps students complete their developmental and/or pre-requisites level MATH courses prior to the start of Spring 2021

How much does it cost?

Tuition is FREE but students must commit to the 10-day program as an investment in their education.

When does it run?

January 4th to January 15th (Monday through Friday)

Online from 9:00 a.m. to 1:00 p.m., Students must have internet access, a computer with a video camera, and must attend and be engaged in classes during the scheduled time on Zoom (or other software).

Does this affect my Financial Aid?

No, actually this program helps you save your Financial Aid by giving you the opportunity to reduce the number of course hours required to complete your Math prerequisites.

How does it work?

Participants will work on skill-building problems in Math. Upon completion, students will be assessed in Math basic skills. Students who complete the Math Emporium and pass the placement test will have the opportunity to eliminate up to 6 non-credit bearing hours of Math in the subsequent semester. Participants will begin the following semester better prepared to meet the academic and social demands of college.
