

NJCU F5 VPN SETUP AND CONNECTION INSTRUCTIONS

Managed by the Department of Information Technology

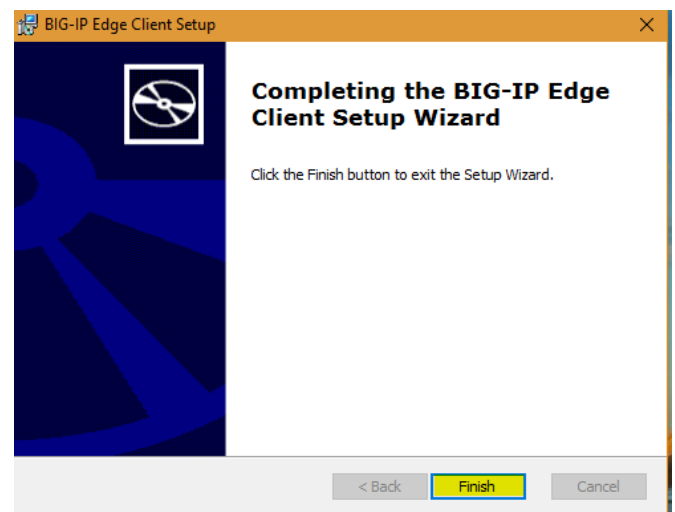

Step 1. Download VPN Client

Download the VPN Client from the following url: <http://web.njcu.edu/njcuvpn.zip>

Step 2. Install the Client

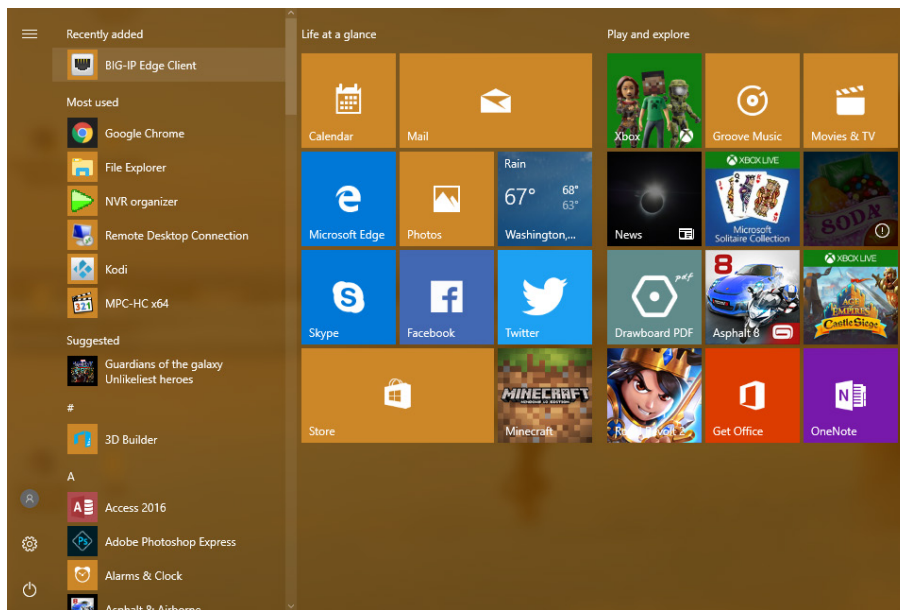

This will bring up the install wizard
click on install to start the install:

The install will take a few minutes. Once it's done click on the Finish button.

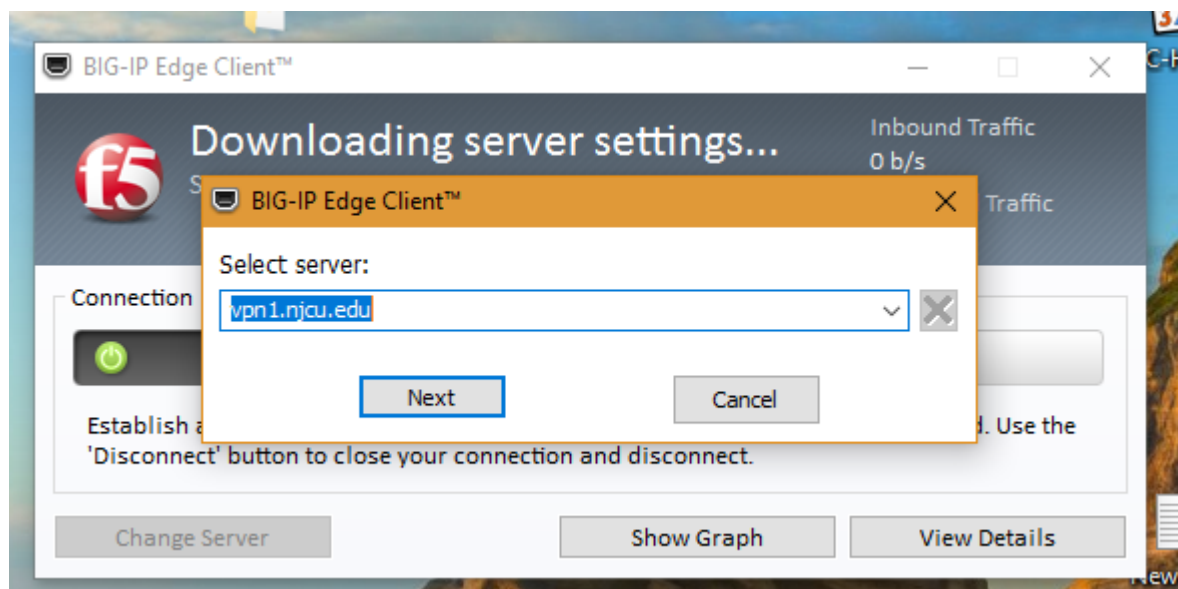

Step 3. Run the VPN Client

Click on the Application in the start menu

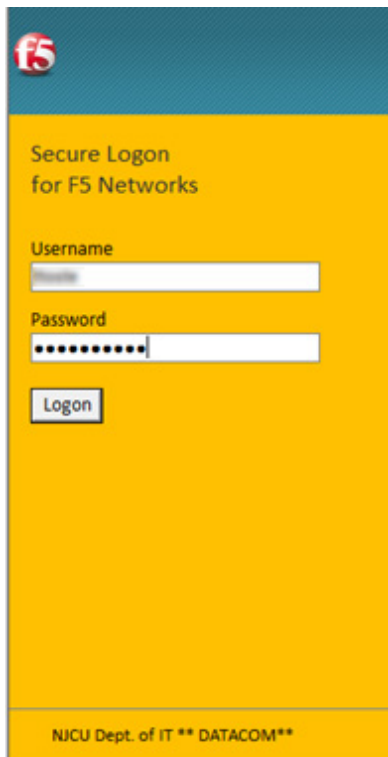

Once the VPN Client opens (the first time only) you will need to input the server name.

vpn1.njcu.edu

Once you've entered the server name and hit next. It will automatically start to connect to the VPN system. You will be prompted to enter your credentials.

These are the same as your Gothicnet.

A screenshot of a web-based login interface. At the top left is the F5 logo. The title is "Secure Login for F5 Networks". Below the title are two input fields: "Username" and "Password". The "Password" field is masked with dots. Below the fields is a "Logon" button. At the bottom, it says "NJCU Dept. of IT ** DATACOM**".

You are now connected. To disconnect or reconnect you'll need to click on the application via the system tray. See the two options for Connect or Disconnect.

You will be prompted for your login credentials every time you log in.

For further assistance, contact the Department of IT Help Desk.
