

NJCU REMOTE CONNECTION INSTRUCTIONS

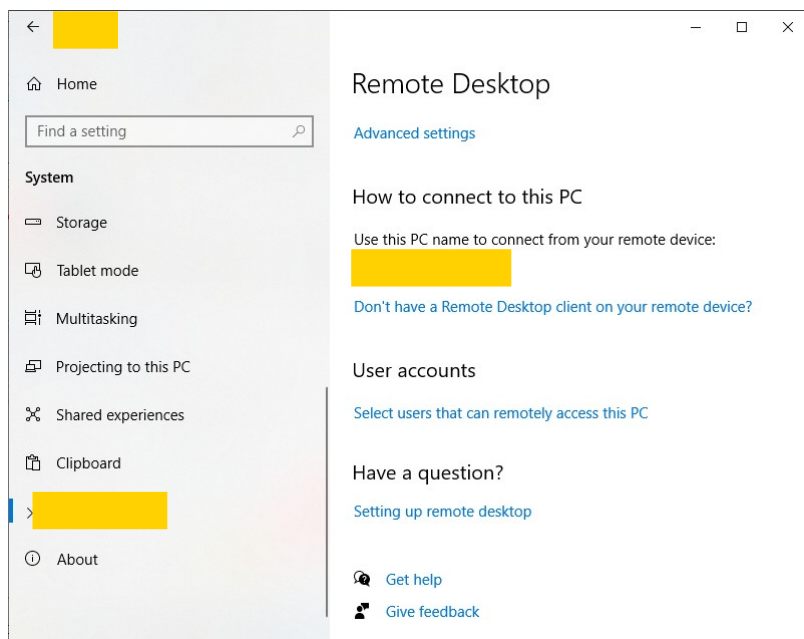

The following instructions will detail the steps required to connect to your WINDOWS office computer as though you are sitting in front of that computer, you will need to utilize Remote Desktop Connection.

To remotely connect to your WINDOWS NJCU computer. You need to download the Microsoft Remote Desktop **from the App Store.**

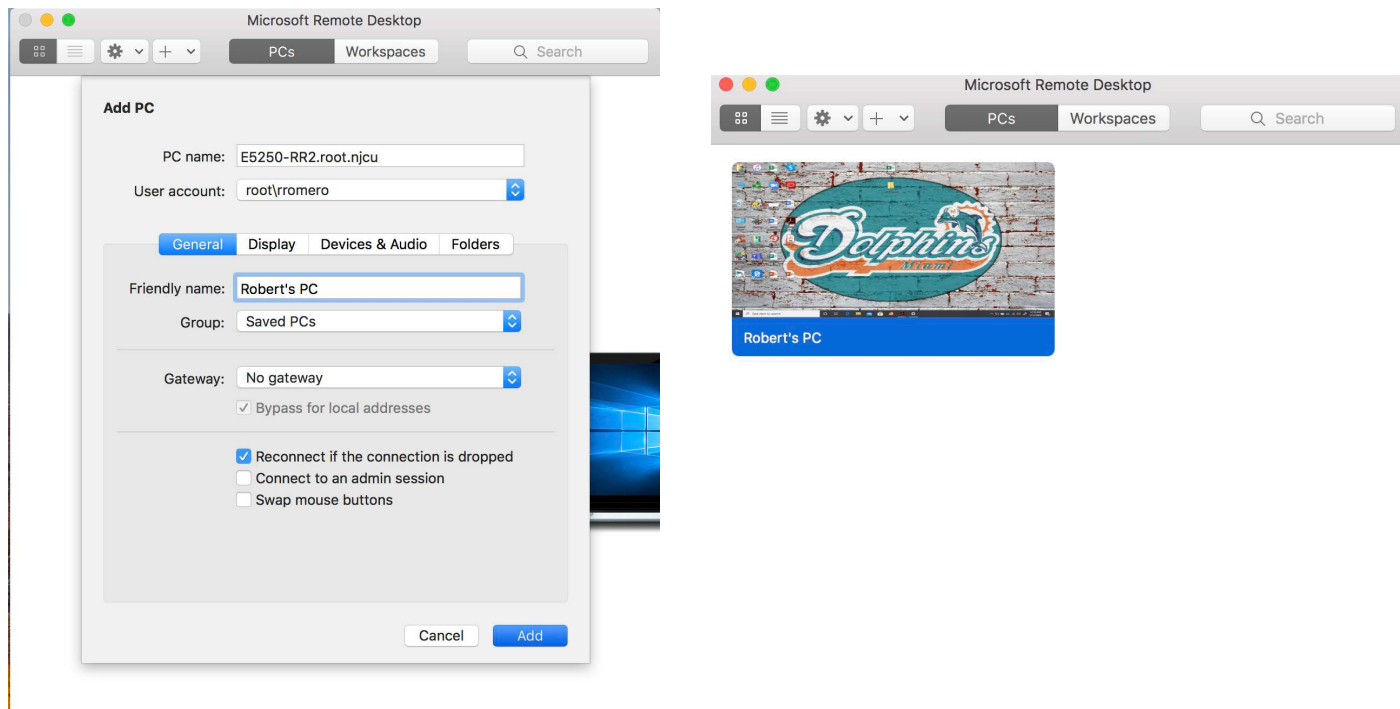

Connecting Mac to Windows is the most common.

After downloading the Microsoft Remote Desktop to connect from Mac to windows you need to add a remote desktop and enter your NJCU computer HOSTNAME.

The name is found in settings> Remote Desktop> Use this Name...

Once you have the name enter the information click on add, now you can connect to your windows machine.

This should allow you to access your windows NJCU computer remotely. You may be prompted to enter your GothicNet credentials to log into your NJCU computer. Just follow the instructions when prompted.
