“Data Protection and Small Business: A conversation on GDPR and protecting your data”

Global data and privacy of that data is fast becoming a requirement of companies to regulate and provide adequate compliance measures. Policy is directing that operations for even micro, family, and small companies dedicate resources to how they control and process data they collected on others. Recently, a new law was passed in the European Union (EU) known as the General Data Protection Regulation (GDPR) which will go into effect in May. This new law has strict new privacy restrictions governing the use, collection and storage of personal data. Come listen to experts on this new law and how your business should be better prepared to protect its data in the U.S. and abroad.

Keynote Speaker

Valerie Huttle

New Jersey Assemblywoman (D),
37th Legislative District

- MODERATOR -

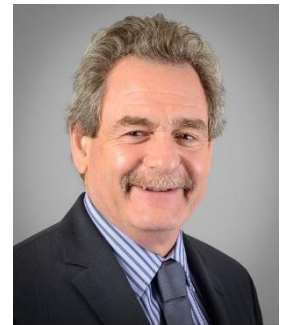

David Weiss, Esq.
