

Overview

In Fall 2016, NJCU conducted the *You & NJCU* survey of undergraduate students. A total of 888 students participated, 14% of the undergraduate student body. The distribution of students by College is similar to that of the University population. Demographic characteristics of participants are detailed in the appendix.

College	Participants	University
Arts and Sciences (CAS)	53%	47%
Business (SoB)	23%	21%
Professional Studies (CPS)	20%	24%
Education (COE) ¹	13%	12%
Undecided/other	4%	8%
Total	888	6663

¹Co-major, double count, not included in total

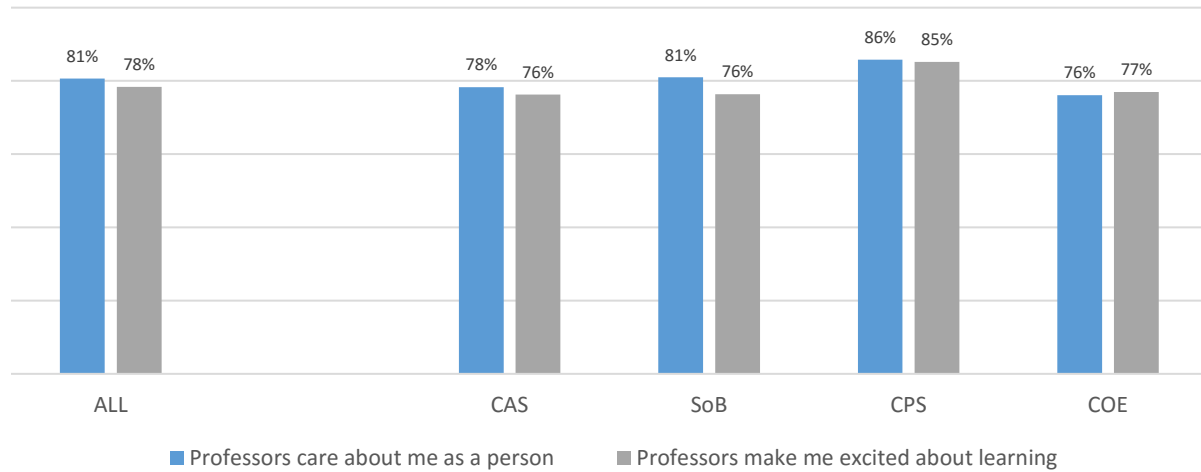

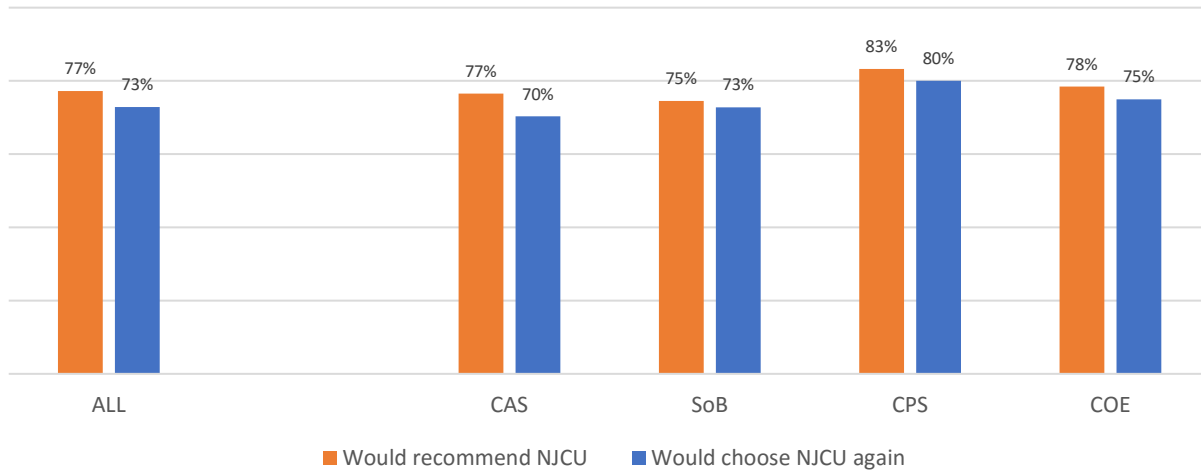

Key findings of the survey regarding student attitudes and experiences include:

- Students are generally happy with their experience as an NJCU student and with their interactions with faculty and with other students.
- The majority of students are on campus at least three days per week and take at least some day classes. They prefer one-day per week courses, beginning late morning. If students had any problems registering, it was most often due to the times classes were offered.
- Overall, faculty instruction emphasizes scholarly abilities, critical thinking, and information literacy, with students reporting gains in these areas. Civic engagement is the least emphasized.
- By mid-November when the survey was administered, almost three-quarters of students had met with their faculty advisor at least once, and almost one-fifth had met four or more times. Over 40% had met with their career (UAC) advisor by this time.
- Student are overwhelmingly satisfied with the library. Satisfaction is also high for the Health and Wellness Center. Dining and Parking are areas of low satisfaction for students.
- The most popular campus activities for students are lectures, workshops, and club meetings.

NJCU Overall

The survey asked for level of agreement with specific statements about satisfaction with NJCU. In general, students are positive about NJCU and their experiences here, with CPS students appearing most satisfied. CAS and SoB students were less positive than were other students about the extent to which NJCU is preparing them for life after college.

Preferred Start Times for Classes (Multiple Selections Permitted)

The most popular starting time for classes is between 10am and 12:30pm. CPS students have a stronger preference for early morning classes than do students from other colleges. Both SOB and CPS students have a preference for late evening (7pm or later) start times. SoB students express the strongest preference for fully online classes.

Problems Registering for Classes

Almost 30% of students have not encountered difficulties registering for classes. For those that did have problems, inconvenient class time was the most common issue. Courses not being offered was a problem for students in all but SoB, and time conflict was a problem except for those in CPS. Students in CAS and COE also indicated lack of clarity on what courses were necessary to take.

Academic Progress

This section describes perceptions and experiences related to:

- ⇒ Emphasis on Specific Skills and Abilities
- ⇒ Gain on Specific Skills and Abilities
- ⇒ Knowledge of Semester Progress

Perceived Emphasis and Gain in Specific Skills and Abilities

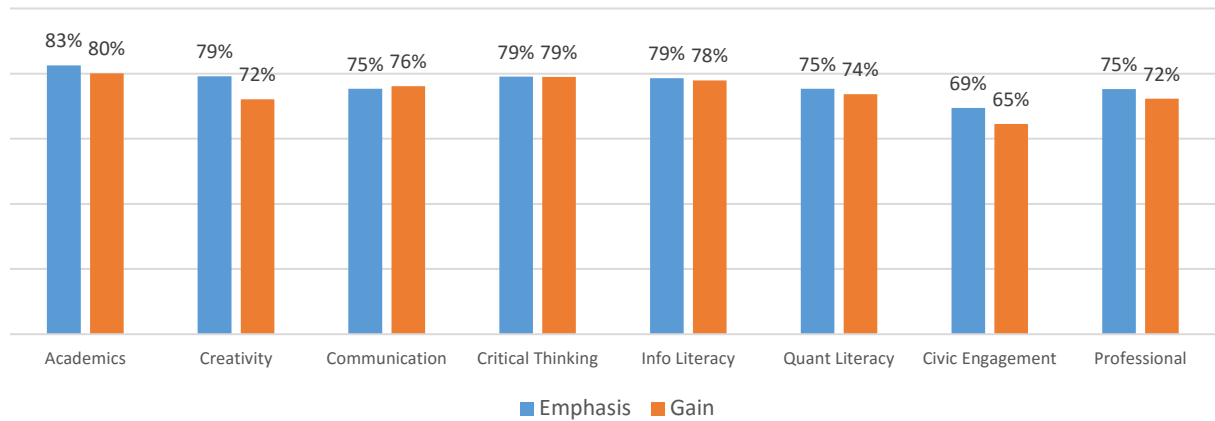

Respondents indicated the extent to which NJCU emphasized specific skills, and the extent to which they made gains in these areas. The tables and graphs display the percentage of students reported strong emphasis/gain. Overall, students indicate the strongest emphasis on academic/scholarly abilities, critical thinking, and information literacy. Gain was rated high in these areas, as well as in communication. Emphasis on and gain in civic engagement is rated lowest. Across colleges, CPS students tend to indicate comparatively higher emphasis/gain and COE students lower emphasis/gain.
